

# MONDELEZ PHILIPPINES, INC.

## SUSTAINABLE SNACKING

**SUSTAINABLE SNACKING** is about *creating a future where people and planet thrive* by *creating resilient ingredient supply chains, reducing our environmental impact and developing zero-net waste packaging*. We're producing our snacks with less energy, water and waste; and sourcing our ingredients more sustainably.

### OUR 2025 GLOBAL SUSTAINABLE SNACKING COMMITMENTS

- Use **100% recyclable packaging** to reduce waste and protect our environment.
- **Reduce water usage by 10%** in manufacturing sites where water is most scarce.
- **Reduce our end-to-end CO2 emissions** by improving energy management systems and investing in energy efficient technology.
- **Source 100% sustainable cocoa** by scaling our Cocoa Life sustainability program.
- **Reduce food waste** by searching for innovative reductive solutions among our facilities and associates around the globe.

“ At Mondelez Philippines, our path to positive impact begins by *collaborating with communities*. Our experience shows *we can make a greater impact by collaborating with organizations* who share our passion to *promote active, healthy lifestyles*. ”

### JOY SCHOOLS RECYCLED PLAY AREA

Our another action under sustainable snacking is the *recycled plastic play areas* of our adopted Joy Schools, which use **ecobricks**. It provides alternative uses to materials like plastic packaging instead of being waste. We have already *turned over 4 play areas* which will enable children to play more and be active, and be part of the recycling efforts.

### OUR SUSTAINABILITY PROJECTS

100% sustainable energy use through Geothermal energy

Biomass Boiler uses biodegradable fuel like rice and coconut husks instead of LPG or diesel

Solar street lamps

Ultraviolet Light and Reverse Osmosis

Water treatment facility

Solatubes for natural lighting

No unnecessary plastic use inside the office

### GO GREEN PROJECT

In the Philippines, the Go Green project was created in **2008**. This integrates improving environmental performance into the

Company's sustainable development strategy while delivering business benefits.

The Go Green project aims to **reduce Mondelez Philippines' use of resources** inside its manufacturing plant and office (water and electricity usage, packaging use and carbon emissions).

*We are proud of our progress and remain committed to using our global scale and focus where we can continue to make the biggest difference. Our **2025 Impact Goals** provide a clear roadmap for the years ahead including making all our packaging recyclable by 2025.*
